

The American Institute of Architects Continuing Education System

AIA/CES Registered Provider Program Summary

Provider: National Glass Association

Length: 1 hour

Program #: NGA0524_L

Credits: 1 LU Hour

Program: Key Advances in Fire-Rated Glazing

HSW: Yes

Description: A study of the fire-rated glazing material available in today's market.

AV Needs: Electrical power, screen and computer projector for the PowerPoint presentation. The CES facilitator supplies the laptop and laser pointer.

Learning Objectives:

- Explain the differences between fire protective and fire resistive glazing
- Describe two benefits of fire-rated glazing in a fire protection plan
- List the key components for approval of fire-rated glass
- Compare and contrast the costs of fire-rated glazing, and a passive fire protective system with an active system

How Taught: The CES facilitator utilizes a PowerPoint presentation to offer a live presentation, allowing time for Q&A with the participants.

Facilitator Qualifications: All NGA CES facilitators have signed the AIA speaker agreement. In addition, the facilitators are individuals working within the commercial architectural glass industry at member companies of the Association.

Target Audience: Architects, specifiers, owners and other design professionals in the commercial market. The ideal audience size can be one-on-one or over 50. The program meets every experience level with time designed into the program for questions and answers.

Costs: There is no cost to bring this program into your firm or chapter meeting.
